CAP IT!

COVER THE EQUIPMENT TO PROTECT IT

SECURE IT!

SECURE THE CAP WITH THE BAND PROVIDED

CUT IT!

CUT AWAY EXCESS AS NEEDED FOR A FULLY CUSTOM FIT

...SHOOT IT!

The MEDIUM CAP IT! COVER fits the vast majority of production setups—big zooms to primes. This versatile CAP was made for production cameras allowing space for batteries, wireless transmitters, onboard monitors, etc.

Perfect for an Arri Alexa, built out Mini/Red packages or even broadcast setups, CAP IT! COVERS are made to be expendable, are easy to pull on/off and are thin enough to work with touch screen technology.

Disclaimer: Don't be a numpty! This is designed to be lightweight disposable camera protection. This is NOT designed as an underwater housing. It is NOT bullet proof NOR fire resistant and probably doesn't taste very good if ingested. If you were to put it over your head, you are likely to not be able to obtain oxygen! Inspect any CAP IT! before every use and use wisely. Any damage to you, your equipment or your ego is NOT our responsibility.

We would however appreciate photos.
